- 100% Impact Resistant

Easy to Install and Replace

When homeowners contemplate remodeling their kitchen and bath, their first instinct is often to completely replace everything in the room. However, conventional remodeling is messy and costly, requiring the removal of floors, beams, walls, and fixtures, and a complete rebuild with new materials.

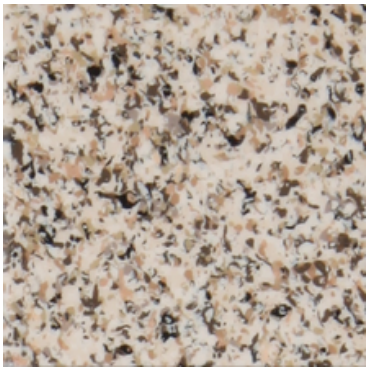

Refinishing is a time-tested technique that has been around for over 50 years.

With modern refinishing techniques and high-quality materials, our team of well-trained technicians can help you save up to 80% of the cost of replacement.

Refinishing is available in a variety of finishes.

Refinishing is applicable to showers, tubs, and various surfaces, with acrylic refinishing being versatile for kitchen countertops, bathroom sinks, and tiles. This cost-effective process rejuvenates worn surfaces, providing a modern look without full replacement, and is popular for both residential and commercial use.
